ECN Business/Enterprise Wireless

BUSINESS FIBRE SOLUTION OVERVIEW

ECN's Business Wireless Internet Access is a data and / or voice solution which provides businesses with high performance and reliable Internet connectivity over microwave technology. Data and voice are transmitted via a dedicated wireless link from your office to the nearest ECN data centre. Wireless connectivity is subject to coverage and availability. The service supports interim and / or redundant options.
ECN PARTNERS

TYPICAL DEPLOYMENT

PRODUCT RULES

} Special builds will be considered in areas where towers are further than 5km radius.
} No link aggregation. One Wireless service, one customer, distribution of one link amongst multiple customers is not allowed.
} Upgrades are allowed within the contract term
} Downgrades will not be allowed below the original service application.
} The service may be requested anywhere where indicated as feasible by Provider.

PRODUCT RULES

} Lead times are estimates and influenced by many factors which are outside the control of the Supplier. These may include – but are not limited to – other network operators, private landowners, and landlords. Inclement weather conditions may affect construction work.
} ECN shall do everything reasonably and practically possible to meet installation times but shall not be held liable in any way whatsoever for any delays in the installation of a Link.
} Upgrade timelines are subject to no additional equipment and or tower capacity being required.
